## Jaaxy Keywords - Your Own Crytal Ball

Have you ever wanted to delve into another person's mind to discover their desires?

Well here's a peek preview on how to actually achieve that goal and analyse the specific nature of a person's search criteria

**Name:** Jaaxy

**Website:** [jaaxy.com](https://jaaxy.com)

**Price:** FREE to start, then from \$49 per month to \$99 per month

**Owners:** Kyle & Carson

**Overall:** One of the best crystal balls on the market

### The Good & the Bad

Jaaxy is an online application that combines the power of search optimised keywords with a state of the art diagnostic tool, enabling you to efficiently work out the best strategy for increasing your web traffic. Or to put it simply for the neophytes.

It's a tool that gathers the most prolific words people use to find what they are searching for online, so all you have to do is insert the key phrases on your website, and presto! YOU start an avalanche. ( yeah if only it were that easy), but it's a start. And never forget, Roger Bannister and his four-minute mile? (always in a rush some folk ; )

We all want to live forever (well I do), and whenever you find some way of holding back the clock and making your day run smoothly, who wouldn't?

Time is of the essence and the more of it we can hold back the longer we live. I know, it's all a matter of perspective.

So, here are some specific advantages when using Jaaxy

- No filler (unneeded graphs or information)
- Keyword research results are extremely accurate
- Can source domain availability right inside the platform
- jaaxy is an online app' so NO software to install
- support is super fast and efficient
- idiot proof interface (I use it)

## Why Would You Not Want To Be At An Unfair Advantage?

Jaaxy was developed by two super techies, for their own use and to receive up to date, accurate information to push their business forward. And these guys are very successful, not only from using their own technologies but for sharing it with like-minded people like you and muah.

Here's a list of people who would benefit from using Jaaxy:

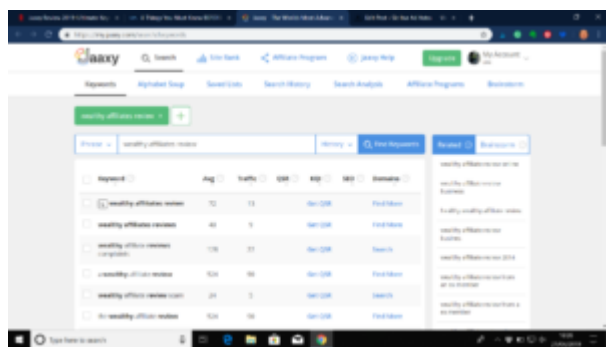

- Pro' bloggers
- Site flippers
- SEO companies

- Spys?
- people looking for niches
- people looking to win the game of business
- freelance writers
- etc, etc

There are many free keyword research applications out there, but you've got to ask yourself if they're accurate or not. To waste time in business is sacrilege. And I for one don't want to be rushing around like a headless chicken constantly trying to find ways to move my business forward.

The guys who developed Jaaxy have done all the legwork for us, so all you have to do is press a few buttons, easy peasy.

## How Much Does Jaaxy Cost?

The owners of Jaaxy are so confident in their product they offer a free trial, so you can make up your own mind if it suits how you conduct your business without any outlay.

**The Pro Plan** is \$49 per month and offers everything a beginner or intermediate needs to carry on their quest in keyword research. You will get:

- Unlimited keyword searches
- Domain availability on demand
- 3 X faster research (compared to the free offer)
- SEO power analysis
- Site/post rankings
- keyword lists
- brainstorm feature
- spy on your competition analysis

**The Enterprise Plan** is \$99 per month

This option is for the big boys/girls! Here's what you get:

- 5x faster than the free version
- Gives you competition analysis instantly!
- Data organisation is now available
- you can have up to five tabbed searches
- The alphabet soup search show up to fifty results instead of just fifteen!

Basically, it delves deeper and faster into your assigned metrics, allowing even more time to surge ahead in your business venture.

## Low Hanging Fruit - Swim in the blue waters of abundance

Both are terms used in marketing for a very good reason. The low hanging fruit is analogous to "most of the fruit that is left". All the ripe stuff shining in the sun, attracting all sundry of insects has, needless to say, hoards of competition.

Similar to the blue ocean analogy -

Who wants to swim with all the sharks fighting for the crumbs and making the water "RED"

Jaaxy allows you to find all the low hanging fruit, enabling you to shine without all the battles. Smooth sailing one might say.

## Try Flipping Domains

This is a great way to use Jaaxy if you want to make some easy money (when I say easy, it still takes some work).

You could search for very competitive keywords that folk are punching into their computers, and find a relevant domain, purchase it and then flip it for a nice little profit. Or sit on it a while and make some hefty gains. It's all in the research baby! ; ) Go on, have a free search, you'll love it!

There you go, a short and concise review to keep you up to date with all the relevant news. If you want a more in-depth review this guy is tops: [Louie](#)

If you have any comments, please leave them below. I'd love to share perspectives

Cordially

Dedo Harrison
